RE: Class III Permissive Change Request

FCC ID: QWP-50450I

To Whom It May Concern:

Please be advised that pursuant to FCC Rule 47CFR 2.1043 the manufacturer requests that the above-referenced model be approved for class III permissive change.

The reason for the class III change is an update in software to support operation in UNII-3 Frequency Band. Software support of these frequency bands can only be enabled by software controlled by Cambium Networks.

Cambium Networks confirm that the RF unit hardware tested in this UNII-3 class III permissive change request is electrically and mechanically the same as the original Part 15.247 submission.

Cambium Networks confirm that there has been no change to the original Software, Distribution and Security Documentation to support this class III permissive change request.

Thank you for your attention to this matter.

Yours faithfully

Donald W Reid
