Date: 13th March 2017

RE: Class III Permissive Change Request

FCC ID: QWP-50450M

To Whom It May Concern:

Please be advised that pursuant to FCC Rule 47CFR 2.1043 the manufacturer requests that the above-referenced model be approved for class III permissive change.

The reason for the class III change is an update in software to support 5MHz Bandwidth operation in UNII-1, UNII-2A, UNII-2C and UNII-3 Frequency Bands. Software support of these frequency bands can only be enabled by software controlled by Cambium Networks.

Cambium Networks confirm that the same revision of RF unit hardware has been used in both the original UNII-1, UNII-2A, UNII-2C and UNII-3 submissions and in this class III permissive change request.

Cambium Networks confirm that there has been no change to the original Software, Distribution and Security Documentation to support this class III permissive change request.

Thank you for your attention to this matter.

Yours faithfully
Cambium Networks Ltd
