Subject: Certification Application for FCC ID: QWP49XX

Dear Sirs

It is requested that the following information is to be held confidential on behalf of Motorola, Inc.

Item	No of Files	Pages Per File
ODU RF Block Diagram	1	2 in .pdf
OS49400 Operational Description	1	5in .pdf
ODU Digital Block Diagram	1	1 in .pdf
ODU Digital Schematics	1	18 in .pdf
ODU RF Schematics	1	23 in .pdf
Indoor Units Schematics (covers this unit and a companion unit)	1	4 in .pdf
Bills of Material	2	Integrated Unit - 7 pages in .pdf Connectorised Unit - 8 pages in .pdf Indoor Unit - 2 pages in .pdf

Reasons for Confidentiality Request

1. Motorola, Inc. is proposing to market the OS49400 product as a Wireless Ethernet Bridge operating at 4.9GHz. This is a highly competitive market where Motorola, Inc. believes its product will have significant performance advantage in terms of its operation in Non Line-of-Sight conditions. The materials listed above identify the methods used in the product to achieve the performance advantage and contain significant Intellectual Property developed by Motorola, Inc. The publication of some or all of the information could allow this performance advantage to be unfairly eroded by the competitors of Motorola, Inc.
2. Motorola, Inc. has entered into non-disclosure agreements during the development process with some of its key component suppliers. Publication of schematics and Bills of Material would compromise those agreements.
3. Motorola, Inc. has taken steps during development of the product to keep confidential its plans:
 - a. The Motorola, Inc. web site was only upgraded to give brief details of the product once the formal launch date was finalised.
 - b. Technical papers produced by Motorola, Inc. do not identify how the performance advantage is achieved
 - c. Prior disclosure to 3rd parties has always been under the terms of specific non-disclosure agreement.
4. Motorola, Inc. believes that no benefit would accrue to the general public in the event of publication of the material listed. The only beneficiaries would be the competitors of Motorola, Inc.
5. Motorola, Inc. believes that the material listed should be kept confidential for a period of 5 years from the date of submission in order to prevent its competitors from copying its technology.

Yours Sincerely

Clem Fisher
RF Development Manager
