To Whom It May Concern:

PipingHot Networks Ltd (trading as Orthogon Systems) produces the OS-Spectra Wireless Ethernet Bridge System that operates in the ISM Band 5725MHz to 5850MHz.

The product is approved by the FCC under ID number QWP58100.

Since that approval, the product has been enhanced by a number of changes; appropriate testing has been carried out to ensure that the product continues to meet the FCC requirements.

The changes involved are

- a) introduction of a new indoor power supply unit (PIDU Plus); photographs of the new unit are attached
- b) activation of the data paths for the integrated interface for E1/T1 traffic
- c) activation of a feature to allow short term transient link asymmetry (up to 80/20%) under high data rate conditions
