

To who it may concern

**Declaration of the functional equivalence of the backup antenna**

Dear Sirs,

peiker acustic GmbH, located at Max-Planck-Strasse 28-32; D-61381 Friedrichsdorf, Germany, declares that the description of the internal backup antenna in chapter 4.5.1 of the product specification sheet is similar to the function of the external backup antenna.

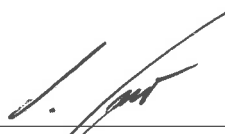

By default, ATM-02 backup antenna is not used for GSM/WCDMA/LTE purposes. Only in case an emergency call is triggered it is distinguished whether the external antenna or internal antenna has to be used.

Yours sincerely,

---
