August 11st, 2014**Subject: Request for Limited Modular Transmitter Approval**

FCC ID: QWY-V1140-100
Model Name: V1140-100

TO WHOM IT MAY CONCERN

Pursuant to 47 CFR §15.212, we are hereby applying for limited modular approval of the above-referenced FCC ID, based on compliance with most of the criteria as detailed below.

Modular approval requirement per 47 CFR §15.212	Is the requirement satisfied?
(i) The radio elements of the modular transmitter must have their own shielding	Yes
(ii) The modular transmitter must have buffered modulation/data inputs to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Yes
(iii) The modular transmitter must have its own power supply regulation.	No. The 3.8V voltage regulator is not located on the module itself but on the development board
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204(c).	Yes

(v) The modular transmitter must be tested in a stand-alone configuration, <i>i.e.</i> , the module must not be inside another device during testing for compliance with part 15 requirements.	Yes
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Yes
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	Yes
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	Yes

If you have any questions, please feel free to contact us.

Best Regards,

i.V. Gerald Müller
Vice-President Development
