

## Cover Letter

### Difference between WMI2-W167 to WMI2-W167-M1 & WMI2-W167-M2

The 4-pole-MQS connector is basically interface for the external NFC antenna; the WMI2-W167 is very much the same to WMI2-W167-M1& WMI2-W167-M2 except the interface to external NFC Antenna.

The interface has been adapted to improve EMC stability.

The difference in the hardware on the main board is documented with enclosed pictures. It shows the schematics difference. This change also causes a layout change in this area. All other functions and placements are identical.

Application software remains the same for WMI2-W167, WMI2-W167-M1 & WMI2-W167-M2.
