Hello Alice,

I have some questions.

- 1) The block diagram provided is titled "SL4T01T" is this correct?
- 2) The schematic diagram provided is titled "SL4T01T" is this correct?
- 3) The test date on report HM151177 is 7-June-2004. The biconilog asset em194 was last calibrated 14-May-2004. This would exceed a two year calibration cycle. Is this correct?

I look forward to your reply.

Thank you for using MET Laboratories TCB services.

Best Regards,
