Hi Alice,

We have several administrative issues for this one:

1. Manual w/ users info - I cannot read the manual you submitted. Due to the dark background, the words are blurry at any magnification. Do you have another version we can try?
2. Label - The ID that is on there contains a lower case "z". Per FCC Rules, the FCC Identifiers must contain numbers and uppercase letters. Please resubmit label.
3. Description - Please submit new one with revised FCC ID on it.
4. Schematics - Could you tell me why the schematics submitted have a previously granted ID number (PJT____)? Do these schematics belong to this device?

I have submitted the documentation for technical review, however he will be limited as to how much he can complete until this information is received.

Any questions, let me know.

Have a good evening.

Regards,

Marianne
