

1. Inserting SIM card and Battery

1.1 Inserting the SIM Card

- I. Insert the SIM card (gold-contacts facing downwards) into the SIM slot.
- II. Ensure the SIM card is inserted in the position as shown.

SIM Card

1.2 Inserting the Battery

- I. Insert the battery in the direction as shown.

- II. Slide in the battery door and ensure that it is locked into position.

1.3 Charging the Battery

- I. Insert the AC/DC Power Adapter connector into the Charger socket.

- II. Switch on the main power.
- III. Do not remove the battery from the SABRE™ I during charging.
- IV. When the battery is fully charged, remove the AC/DC Adapter connector from the Charger Socket.

Note: It takes approximately 3 hours to fully charge the battery.

Note: When the SABRE™ I Terminal is switched ON, the charging time will be longer.

Note:  An animated icon to show that the internal battery of the SABRE™ I Terminal has completed charging while the SABRE™ I Terminal is non-operational (switched off).

Note:  An animated icon to show that the internal battery of the SABRE™ I Terminal is undergoing charging while the SABRE™ I Terminal is non-operational (switched off).

For Alpha Only

2 Powering Up and Registering to Network

2.1 Powering Up

- I. Press and hold the On/Off switch for at least 3 seconds
- II. The LCD display will show the Introductory screen.

2.2 Terminal and SIM PINs (4 to 8 digits)

- I. Enter the Terminal PIN number. (Default Terminal PIN: 0000)

(Note: If the Pin is entered incorrectly or if user forgets the terminal's Pin number, send the unit back to the distributor)

- II. Enter the SIM PIN number.

(Note: If the SIM PIN is entered incorrectly after 3 attempts, the PIN will be locked. Use the PUK (Personal Unblocking Key) code to enter new SIM PIN. If the PUK code is entered incorrectly after 10 attempts, the SIM will be disabled. Contact the Service Provider.)

2.3 GPS Fix

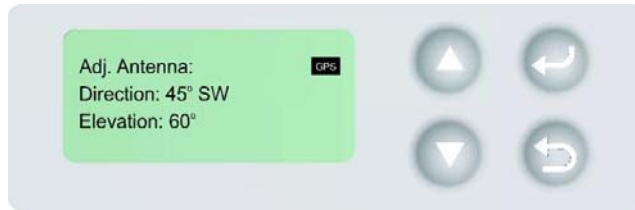

- I. For first time use, SABRE™ I needs to acquire the GPS coordinates, go to an outdoor location and have the SABRE™ I face up to the sky. The terminal shall perform the GPS acquisition automatically.

- II. When acquisition is done, the LCD display will show **New GPS fix** for 2 seconds.

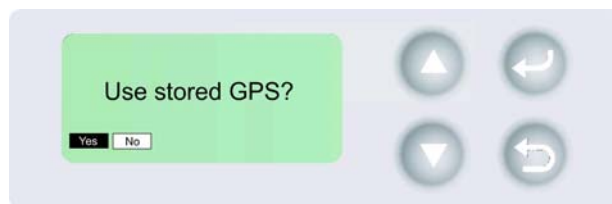

- III. LCD will indicate the new estimated azimuth direction and elevation angle that the antenna should point. A **GPS** indicator will be displayed on the Top Right corner of the LCD display to indicate that a New GPS coordinate is in use.

- IV. For subsequent use, the SABRE™ I will not acquire a new GPS, it will prompt the user if the previously stored GPS coordinates should be used.

To use the stored GPS coordinates, use the Up/Down buttons to select Yes and press ENTER. A **GPS** indicator will indicate the use of stored GPS coordinates.

To re-acquire a new GPS, select No and press ENTER. The SABRE™ I terminal will repeat Step I to III.

- V. Press the ENTER button then the LCD will show the signal strength bar.

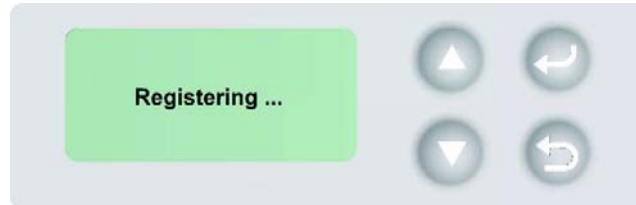

2.4 Antenna Pointing

- I. SABRE™ I is now in Antenna Pointing state.
- II. To obtain the maximum possible signal strength, adjust the antenna by turning and tilting it. For an acceptable services to commence, a signal

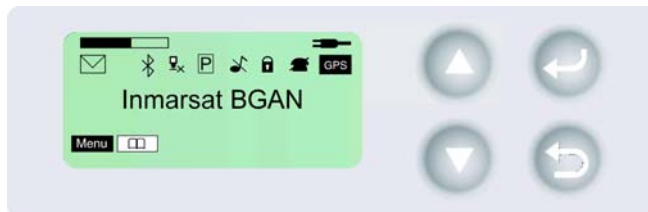

strength of minimum 45 dBHz is required. Press ENTER when the maximum possible signal strength is obtained.

III. SABRE™ I will start the registration with the network.

IV. When registration is successful, the service provider's name will be displayed.

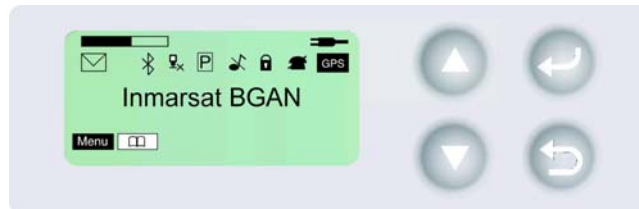

3 Making Phone Calls

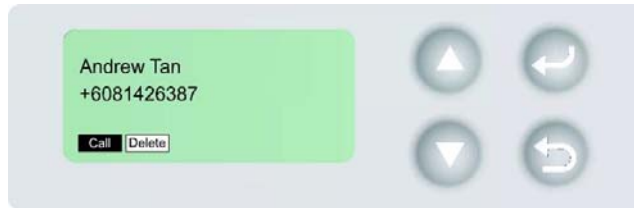

3.1 Using Corded Analog Handset

- I. Connect the Corded Analog Phone to SABRE™ I via the RJ11 phone port.
- II. Making phone calls directly –
 - a. Corded Analog Handset: Press the  to listen dial-tone before dialing and dial the calling party number in the following format; <00><Country Code><Telephone Number><#>
- III. Making phone calls via Phonebook –
 - a. Use the Up/Down buttons to select 

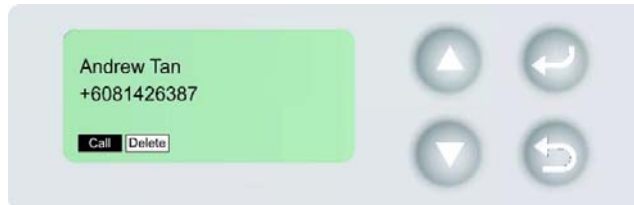

b. Scroll to the calling party's name and Press ENTER.

c. Press the  button of the Corded Analog Handset to listen dial-tone.

d. Use the Up/Down buttons to select **Call**.

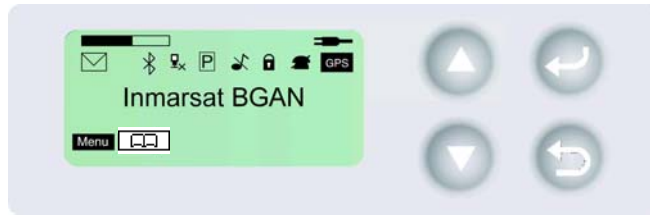

e. Press ENTER to start the dialing sequence.

3.2 Using the Bluetooth Headset

- I. Perform the pairing and connection procedures before proceeding with the following. (Bluetooth device pairing and connection procedures are found in **Section 6 Bluetooth Settings on SABRE™ I**)
- II. Making phone calls via Phonebook –

Use the Up/Down buttons to select .

a. Scroll to the calling party's name and Press ENTER.

b. Press the Connect button of the Bluetooth Headset to listen dial-tone.

c. Use the Up/Down buttons to select **Call**.

d. Press ENTER to start the dialing sequence.

3.3 Using the Bluetooth Handset

- I. Perform the pairing and connection procedures before proceeding with the following. (Bluetooth device pairing and connection procedures are found in **Section 6 - Bluetooth Settings on SABRE™ I**)
- II. Making phone calls directly –
 - a. Bluetooth Handset: Enter the calling party number in the following format; <00><Country Code><Telephone Number> (Calling numbers will be displayed in the LCD).
 - b. Press the  button to start the dialing sequence.
- III. Making phone calls via Bluetooth Handset Phonebook (To be Available)

4 Installing PC programs (For Alpha)

- I. Insert the Product CD into the PC and go to CD Drive.
- II. The following drivers and application are available on the CD for installation:
 - a. **Ethernet driver**
 - b. **Bluetooth Dongle driver**
 - c. **BGAN LaunchPad.**
- III. If **BGAN LaunchPad** is selected, follow the installer's instructions.
 - a. When prompted for the BGAN LaunchPad edition, select **Personal Edition**.
 - b. Continue to follow the instructions until installation is completed.
- IV. If **Ethernet** is required, the respective device driver must be installed in the PC before connecting the Network cable into the respective ports on the SABRE™ I. Refer to Section 7 – Ethernet Setup for the installation steps.
- V. If Bluetooth Dongle is required, please refer to **Section 8 – Installation of Bluetooth Dongle driver**

5 Cable Connections

- I. There are various methods of connecting the SABRE™ I to the PC. Use only 1 method.
Ethernet – Connect one end of the network cable to the PC's network socket and the other end to the RJ45 Ethernet Port.

6 Bluetooth Settings on SABRE™ I

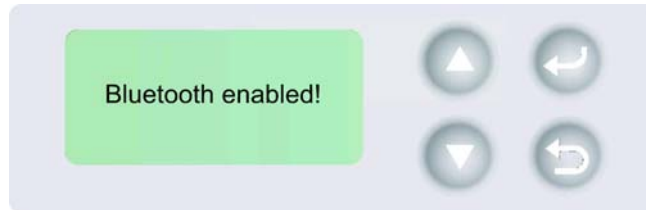

6.1 Enable Bluetooth

- I. From the LCD, use the Up/Down buttons to select **Menu > Settings > Interfaces > Bluetooth > Enable**.

Note: Bluetooth is enabled by default.

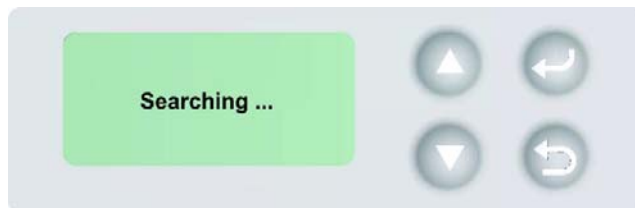

- II. The LCD will display “**Bluetooth enabled!**” for 2 seconds and revert back to **> Bluetooth**.

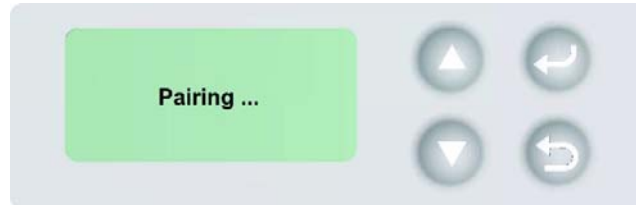

6.2 Pairing of Bluetooth Devices

- I. From the LCD, use the Up/Down buttons to select **Pairing of Device**.
- II. The LCD will display “**Searching...**”.

- III. After searching, the LCD will display a list of devices for pairing. Select a Bluetooth device from the list for pairing. (Devices of the same brand and type may appear as the same name on the list.)
- IV. Enter the Bluetooth device **PIN**. (Wideye Bluetooth Headset default PIN is 0000)
- V. The LCD will display “**Pairing...**”.

- VI. When successfully paired, the LCD will display “**Paired successfully!**” for 2 seconds and revert back to > **Bluetooth**.

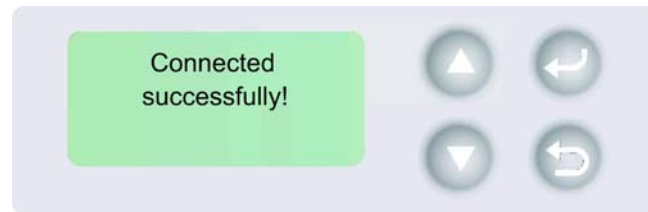

6.3 Connecting to a paired Bluetooth Device

- I. From the LCD, use the Up/Down buttons to select **Paired list**.
- II. From the list, use the Up/Down buttons to select the paired device to be connected and Press ENTER.
- III. Use Up/Down buttons to select **Connect** and Press ENTER.
- IV. The LCD will display the Bluetooth profiles supported on the device.
- V. Use Up/Down buttons to select appropriate profile, for example for Bluetooth Headset select **HSP** and Bluetooth Dongle select **SPP1** or **SPP2**.

- VI. When connected, the LCD will display "Connected successfully!" for 2 seconds and revert back to > **Bluetooth**.

7 Ethernet Setup

7.1 Installation of Ethernet Driver

- I. Double click on the Ethernet Driver Folder.

Name ▲	Size	Type
📁 Ethernet Driver		File Folder

- II. Click **Setup** to begin the installation process.

Name ▲	Size	Type
📁 data1	271 KB	Cabinet File
📄 data1.hdr	13 KB	HDR File
📁 data2	19,621 KB	Cabinet File
📁 engine32	409 KB	Cabinet File
📄 layout	1 KB	BIN File
📄 setup.boot	335 KB	BOOT File
📄 setup	105 KB	Application
📄 setup	1 KB	Configuration Settings
📄 setup	175 KB	INX File

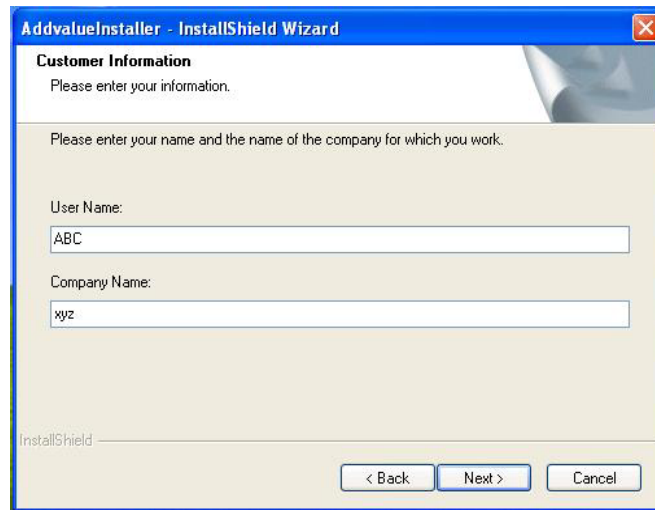

- III. From the Installation Wizard welcome window, click **Next**.

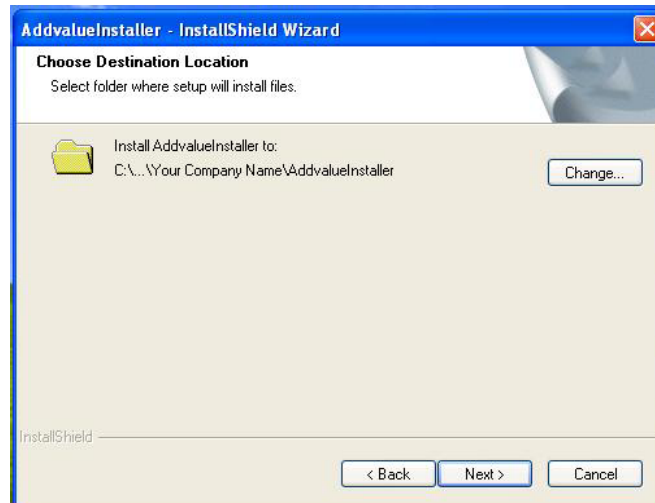

- IV. Select **I accept the terms of the license agreement** and click **Next**.

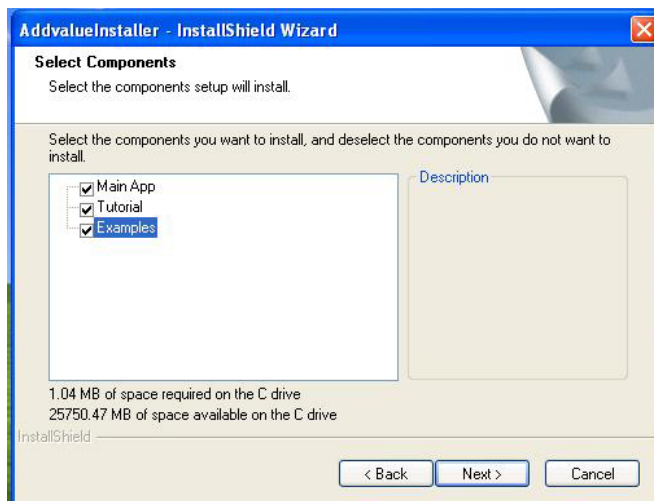

- V. Enter user name and company (if any) and click **Next**.

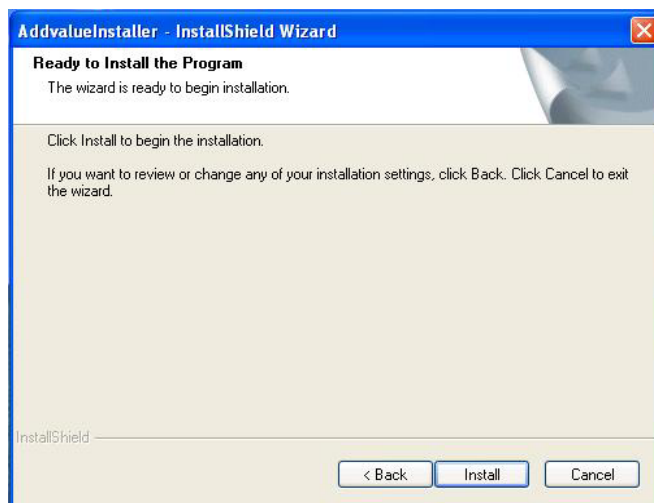

- VI. If there is a need to change the folder where the setup will install the files, click **Change**, after making the change click **Next** to proceed. If change is not needed, click **Next** to proceed immediately.

VII. Select or unselect the components to be installed and click **Next**.

VIII. Click **Install**.

IX. Click **Finish**.

X. An Addvalue Configuration Utility icon will be added on the Desktop.

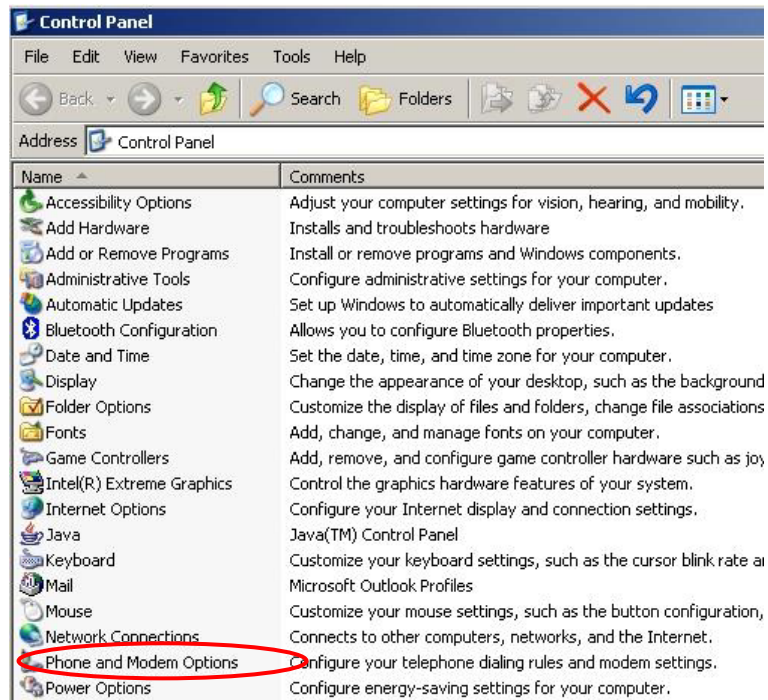

XI. Double-click the icon to open Addvalue Configuration Utility.

XII. Configure only the followings:

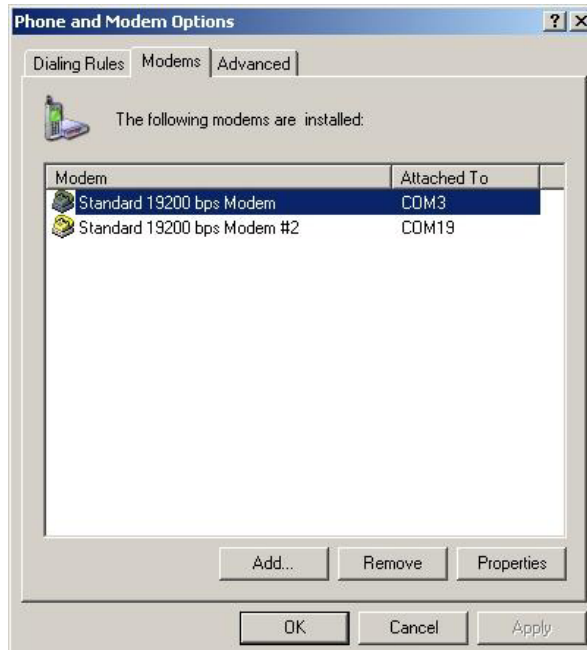

- From the VCOM Port pull-down menu – Choose any available Virtual COM Port for the Modem to be created. (For example: COM 11)
- IP Address of BGAN: **192.168.1.35**
(This is also known as the SABRE™ I's Local IP Address)

7.2 Creating A New Modem

- I. From Control Panel, select **Phone and Modem Options**.

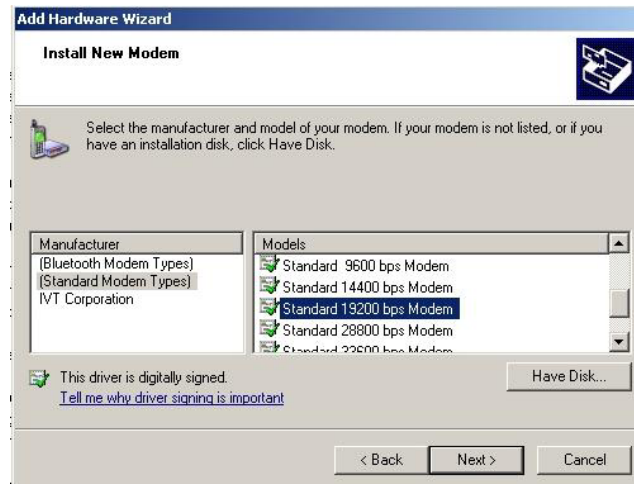

II. Select the “**Modem**” tap and click **Add**.

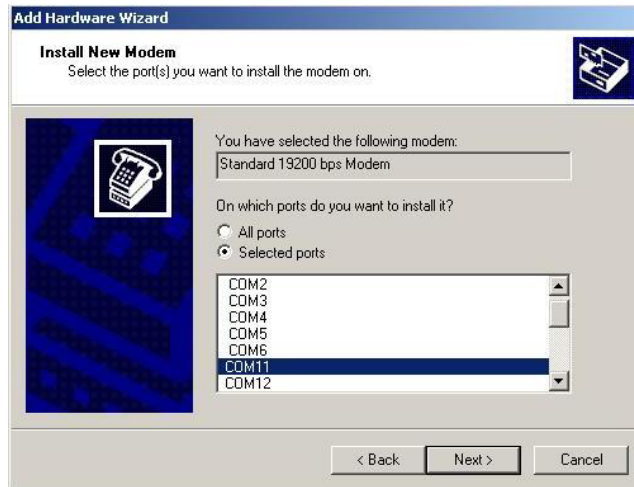

III. Check “**Don’t detect my modem; I will select it from a list**” and click **Next**.

- IV. From the **Manufacturer** list, choose **(Standard Modem Types)** and from the **Models** list, choose **Standard 19200 bps Modem** and click **Next**.

- V. From **Selected Ports**, For Ethernet: select the same COM Port number that was created with Addvalue Configuration Utility (For example COM 11), For Bluetooth: select the two COM Port numbers that was assigned to the when SABRE I pairing was performed with the Bluetooth dongle, and click **Next**.

VI. Click **Finish**.

7.3 Setup the DUN Client

- I. From Win XP Desktop, click **Start**, select **All Programs > Accessories > Communications > New Connection Wizard**.
- II. From **New Connection Wizard**, click **Next**.

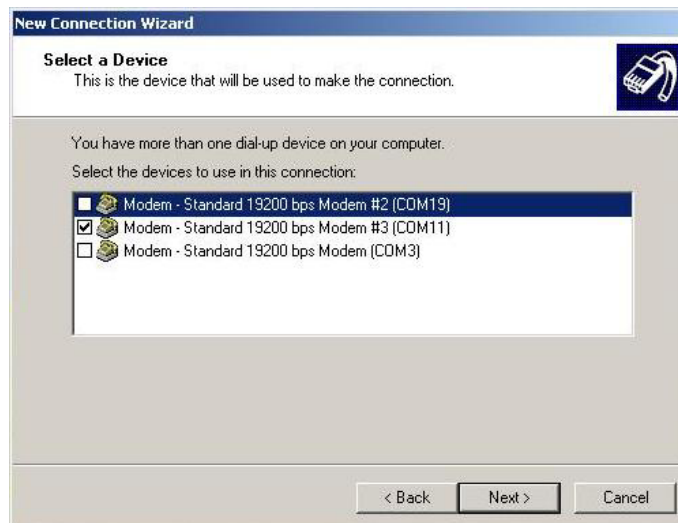

- III. Select **Connect to the network of my workplace** and click **Next**.

- IV. Select **Dial-up connection** and click **Next**.

- V. Check on the modem that was created earlier in 7.2 and click **Next**.

- VI. Enter a Company Name (for example Any Name) and click **Next**.

The screenshot shows a dialog box titled "New Connection Wizard" with a blue header bar. Below the header, the title "Connection Name" is displayed in bold, followed by the instruction "Specify a name for this connection to your workplace." and a small icon of a hand holding a telephone receiver. The main area contains the text "Type a name for this connection in the following box." and "Company Name" above a text input field containing "Any Name". Below the input field, there is a paragraph of explanatory text: "For example, you could type the name of your workplace or the name of a server you will connect to." At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

- VII. Enter ***98*1#** and click **Next**.

The screenshot shows a dialog box titled "New Connection Wizard" with a blue header bar. Below the header, the title "Phone Number to Dial" is displayed in bold, followed by the instruction "What is the phone number you will use to make this connection?" and a small icon of a hand holding a telephone receiver. The main area contains the text "Type the phone number below." and "Phone number:" above a text input field containing "*98*1#". Below the input field, there is a paragraph of explanatory text: "You might need to include a '1' or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct." At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

VIII. Select **Anyone's use** and click **Next**.

IX. Check **Add a shortcut to this connection to my desktop** and click **Finish**.

- X. The DUN Client **shortcut** icon will be created on the Desktop.

7.4 Ethernet settings on SABRE I

7.4.1 Defining PDP Context:

- I. From the LCD, use the Up/Down buttons to select **Menu** and press ENTER. Select **Settings > Network > Data > Automatic** and Press ENTER.

7.4.2 TAF Mode: Proceed with the following steps if TAF settings are required: (Note: By default, the SABRE I is set to TAF mode.)

- I. From the LCD, use the Up/Down buttons to select **Menu** and press ENTER. Select **Settings > Interfaces > Ethernet > Connectivity > TAF Connection** and Press ENTER.
- II. Use the Up/Down buttons to select **Enable** and Press ENTER.
- III. From the PC, open the DUN Client - double-click on the DUN Client icon.
- IV. Click **Dial** to start connection. Username and Password are not required.

- V. Open the Internet Browser to begin “Surfing”.

7.4.3 IP Transparent Mode:

- I. From the LCD, use the Up/Down buttons to select **Menu** and press ENTER. Select **Settings > Interfaces > Ethernet > Connectivity > IP Connection** and Press ENTER.
- II. Use the Up/Down buttons to select **Enable** and press ENTER.
- III. Use the Up/Down buttons to select **Authentication > PAP** and Press ENTER. Press RETURN to revert back to the previous menu.
- IV. Use the Up/Down buttons to select **DNS setting > Dynamic** and Press ENTER.
- V. Use the Up/Down buttons to select **Connect** and Press ENTER.

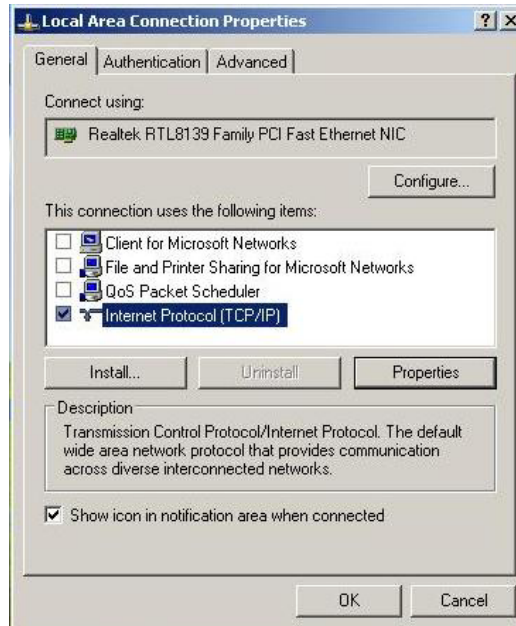

- VI. From the PC, double-click on the Local Area Connection icon (located at the bottom right corner of the PC monitor)

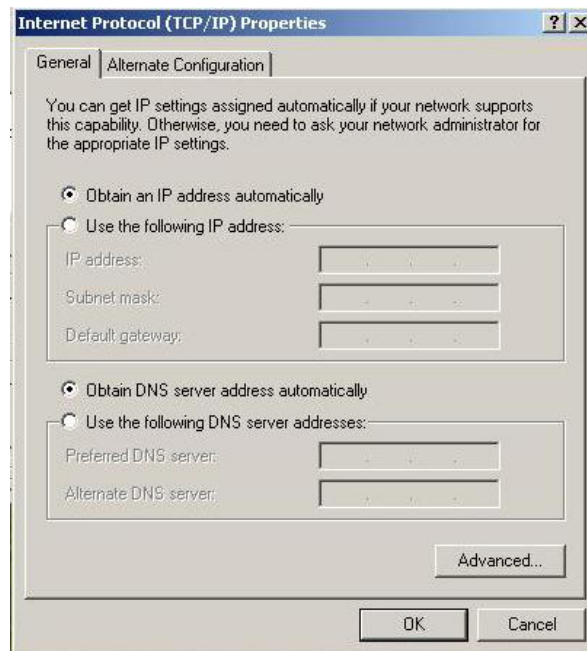

- VII. Select **Properties**

VIII. Select and check **Internet Protocol (TCP/IP)** and click **Properties**.

- IX. Select **Obtain an IP address automatically** and **Obtain DNS server address automatically** and click **OK**.

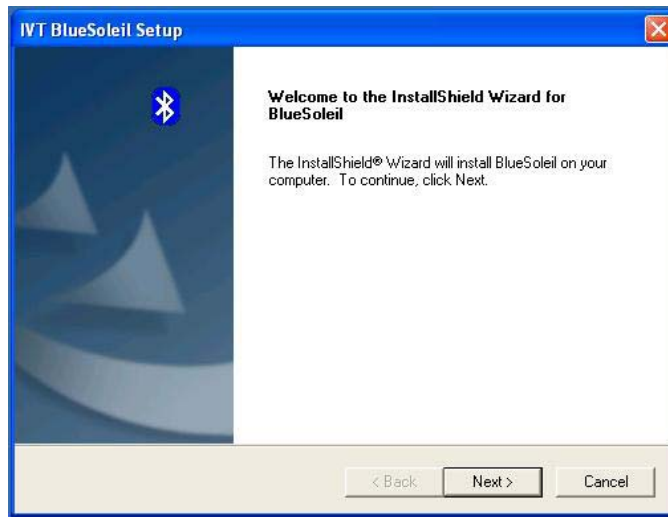

- X. Close all the windows.
- XI. Open the Internet Browser to begin "surfing".

8 Installation of Bluetooth Dongle Driver

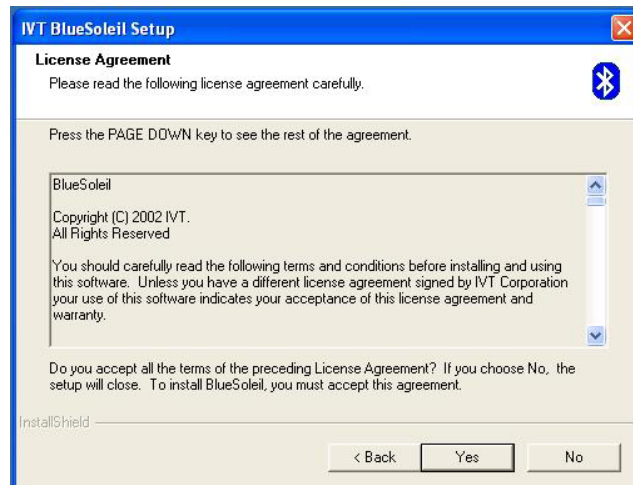

- I. From the Bluetooth Dongle Driver folder, double-click on **Setup**.
- II. Select the language and click “OK”

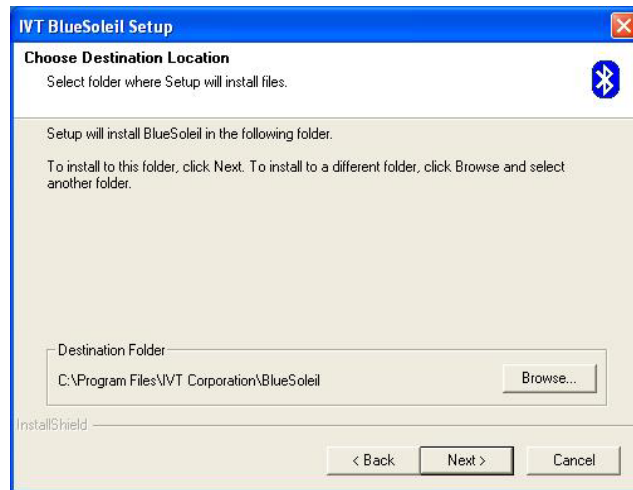

- III. Click “Next”

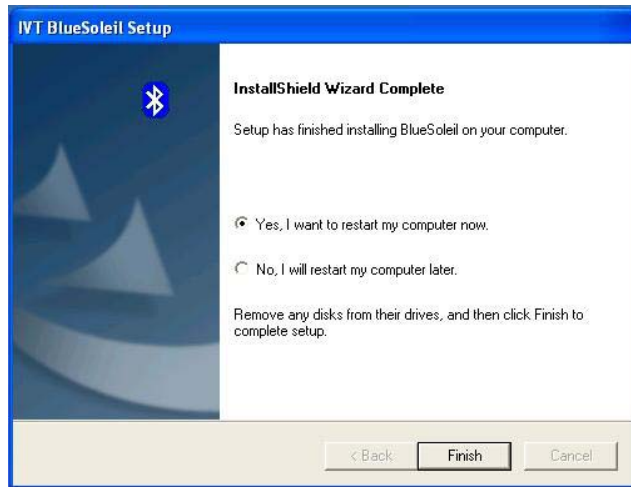

IV. Click “Yes”

V. Click “Next”

- VI. Select “Yes” and click “Finish” to Restart the PC. Now the driver for the USB Bluetooth dongle and connection application are installed into the PC.

- VII. After restart, the IVT application will open. Insert the Bluetooth dongle in a USB port. The PC will detect the dongle automatically.
- VIII. Perform Bluetooth setup as described in **Section 6 Bluetooth Settings on SABRE™ I**. The COM Ports will be assigned for the serial connection.
- IX. Create a New Modem – Refer to **Section 7 - 7.2 Creating a New Modem**
