

Date: January 19, 2022

From: Robert Wroblewski

Subject: Creatinine eGFR Meter Hardware Commonality

Please note that all models of the Creatinine eGFR (Estimated Glomerular Filtration Rate) Meter share the same printed circuit board hardware assembly, display/touch panel and case. The model differences in the Meters are determined by software programming for different languages and different measurement values (mg/dL or $\mu\text{mol/L}$) and labeling of the Meters.

Sincerely,

Robert Wroblewski
Senior Test Engineer R&D
