Attn: Equipment Authorization Branch

Ref: Class II Permissive Change for FCC ID QZC-RX2EA

The purpose of this letter is to request a Class II Permissive Change for FCC ID QZC-RX2EA, a device with limited modular approval. The change filed under this application is:

1. Configure the equipment to use an external antenna. The equipment has always contained the necessary circuitry to use an external antenna but the original grant was obtained using the device's internal built-in antenna.
2. Certify the equipment for use with any of three model families of external antenna.

A detailed description of the changes, including model numbers of the available antennas is provided in the technical description and circuit schematic exhibits. A test report showing compliance for the affected reportable test parameters is also provided for evaluation.

Respectfully,

John Holt
RF Engineer
