Re: FCC ID: QZC-SNKGK4, IC: 4557A-SNKGK4

To whom it may concern,

The Honeywell Elster SynergyNet Router Gatekeeper 4G (SNRGK4) hardware currently being submitted for FCC and ISED Canada filings does not include a cellular MODEM. The current hardware only supports a 900MHz ISM band transceiver and an Ethernet interface for communications.

Future variants of the SNRGK4 will include an LTE MODEM, and many of the current design documents including schematics, block diagram, etc. include references to an "optional" LTE MODEM.

These future variant(s) that include an LTE MODEM will have to go through the process of updating the FCC and ISED Canada grants FCC ID: QZC-SNKGK4, IC: 4557A-SNKGK4.

Respectfully,

Charles Greene
Advanced Wireless/RF Engineer
