Re: FCC ID: QZC-UFTR1

To Whom It May Concern:

The following application is submitted on behalf of our client, Elster Solutions, Inc., for evaluation of their model UFTR1 for certification under FCC Part 15.247 and Part 90.

The equipment is housed in a plastic enclosure. This enclosure is then mounted to a rotating plastic clip used to attach the device to the user's waist/belt. The device includes two transceivers: one operating at 451 MHz or 900 MHz and the other operating at 2.4 GHz. The radios are capable of transmitting simultaneously and were evaluated for intermodulation products.

The EUT was evaluated in full to the aforementioned test requirements and was determined to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'.
