To Whom It May Concern:

This letter is intended to summarize the changes to the Trapeze Networks, Inc. Model 100 Mobility Point.

The digital portion of the board has been relayed out and the part count has been reduced to reduce costs in the product.

In addition, two additional antennas have been introduced. The first is a 3dBi gain Omni antenna from Centurion and the second is an external 3 dBi gain Omin antenna made by Cushcraft.

Please let me know if you have additional questions or comments,

Best regards,

A handwritten signature in blue ink that reads "Lisa Moratti".
