Hi, Helen.

Here is the revised report for CD101.

Regards,

Wei

Question #1: Page 12 of the test report indicated that "Up to 10th harmonics were investigated. " Please note this device is a receiver working at 434MHz, above statement is not applicable. Based upon FCC15.33, you should test radiated emission upto 2GHz. Please correct the test report.

Best regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
