Re: Request for permanent confidentiality

Applicant: Onity

FCC ID: R32-RFIDMFARE01

To whom it may concern,

Request is hereby submitted by Onity to withhold permanently from public review certain portions of the application for equipment certification for the referenced FCC identifiers. This request for confidentiality is made pursuant to 47 CFR 0.457(d) and 0.459 of the FCC Rules. In particular, the following sections of the application are to be kept permanently confidential:

- Schematics
- Detailed Block diagrams
- Detailed Operational/Functional Description
- User manual (with added justification below)

Rationale for request for confidentiality:

Onity has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the permanently confidential portions of this application to competitors would not only give them significant competitive advantages in developing similar products, but would also disclose successful implementation of unpublished, leading edge technology developed by us. The User Manual should be held confidential because this product is only intended for professional installation.

Sincerely,

Chris D. Capelle
Intertek, Agent for Onity
