Federal Communications Commission
7435 Oakland Mills Road
Columbia MD 21046

FCC ID: R33C4TT75G

To Whom It May Concern:

The Control4 Model C4-TT7 was previously certified under FCC ID: R33C4TT7 for use in the 2.4 GHz WiFi band. This product has been updated to include the 5 GHz band. There have not been any hardware changes to the product, the only change was a software change to enable the 5 GHz band. Therefore the previous test reports for the 2.4 GHz band are still valid for this application.

Best Regards

A handwritten signature in blue ink that reads "Roger Midgley".
