SEL-3021 Wireless Channel Attestation

The SEL-3021 is a communications security device. It is aimed at SCADA systems in the power industry where safety and security are a must.

The SEL-3021 communications security device uses an 802.11b wireless interface as a secondary function for device status monitoring and settings.

As per the instruction manual, the SEL-3021 utilizes 802.11b channels 1 through 11 in the 2.4GHz band (2.4GHz to 2.462GHz) with a maximum of 11Mbps/sec. SEL does not support the upper 3 channels, 12, 13, or 14.

Patrick A. Schacher

A handwritten signature in cursive script that reads 'Patrick A. Schacher'.
