Hi Mike,

Reply to Question #2 is not acceptable. Manufacturer can not base upon end user to comply regulatory requirements. Attached please find FCC policy in dealing with user selectable channel. Manufacturer must incorporate a way to prevent the user to select the transmitting channel above Channel 11 (2462 MHz). Please provide technical information on how to achieve above requirement.

Ans #2: The user manual has been modified in page 41, specifying channel 12, 13 will be disabled by software and only Channel 1-11 are applicable. Please refer to it.

Best regards,
Ting

Mike Kuo <MKUO@CCSEMC.com>

Question #1: Submitted schematic diagram only applicable to digital portion of AP. Please provide schematic diagram for the transmitter.

Answer #1: The schematic diagram for the transmitter is provided in the revised file below.

Question #2: Page 41 and 52 of user manual provide the information to the end user to choose the channel list based upon the location of usage. Page 41 only indicates that this device can be used for 13 channel operation. Please provide technical information on how the device will be restricted with 11 channel operation in the U.S. and prevent the end user to use any additional channel which are not authorized.

Answer #2: The customer re-words the contents of "Caution" on Page 41 and asks us to directly submit it to you for your review. Please refer to the following file.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
