Target power of WLAN

TX Power Setting

-Each product is programmed with the pre-defined rf parameters
-Each product RF power level is measured to ensure the power level
 not exceeding the target power level,in a fully calibrated setup.
-The user has no possibility to change these settings later on

Please find below the Transmit Power for production units:

Target Average Power			
11b	11g	HT20	HT40
7±2	3±2	3±2	2±2

Power unit:dBm
