

The image shows the back cover of a black mobile phone, which has been removed to reveal the internal components. A white label is placed in the center of the back cover. To the left of the label is a small green circuit board with four gold-colored circular contacts. Below the label is a larger green circuit board with multiple gold-colored contacts. To the right of the label is a green circular component with a central hole and two smaller holes below it. The back cover has a black plastic frame with various internal components visible.
