|                    | 15C                   | 2412.0 - 2462.0              | 0.04                |                            |                            |

Output power listed is conducted. This transmitter must be installed such that a separation distance of at least 20 cm is maintained between the antenna and all persons during normal operation, and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance. This device is approved as a mobile device with respect to RF exposure compliance.
