TRANSMITTER MODULAR APPROVAL ATTESTATION

February 26, 2008

Federal Communications Commission

Re: Application Modular Approval Certification for FCC ID: R68MPBGPRO

Gentlemen:

The following attestation addresses the eight requirements to support modular approval as required by the FCC Public Notice DA00-1407 "Part 15 Unlicensed Modular Transmitter Approval"

1	The modular transmitter has its own RF shielding and does not rely upon the shielding provided by the device into which it is installed in order to comply with Part 15 limits.
2	The modular transmitter has buffered modulation/data inputs. All inputs to the modules are buffered through the radio circuitry.
3	The modular transmitter has its own power supply regulator.
4	The modular transmitter has an antenna that complies with section 15.203 and 15.204(c) of the FCC rules. It has a Reverse Polarity-SMA type of connector at the transmitter end and is soldered to the antenna (depending on OEM configuration). The antenna used with the module was tested with the module.
5	The modular transmitter was tested in a stand-alone configuration without a chassis during testing to show compliance with Part 15 emission limits. The transmitter module complies with the AC line conducted requirements found in Section 15.207. AC power lines.
6	The modular transmitter will be labeled with its own FCC ID. Also, the OEM host manufacturer will be informed to display a label referring to the enclosed module. The exterior label will read as follows: "Contains Transmitter Module FCC ID: R68MPBGPRO" or "Contains FCC ID: R68MPBGPRO".
7	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.
8	The modular transmitter meets the MPE calculations of 47 CFR 1.1307(b)(1).

If there are any additional questions or if further information is needed, please contact us at your earliest convenience at (949) 454-8295.

Sincerely,
