TIMCO Engineering Inc.
849 NW State Road 45
Newberry, Florida 32669

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a mobile approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a submittal for mobile approval of the DRIG Wireless Device Server (MN: XSDR22W00-01, FCC ID: R68XSDRWLSG), which is a Wireless Device Server that provides a network-enabling solution based on the IEEE 802.11b/g wireless standard.

It was tested as a standalone device with a Wansih 2.89 dBi Antenna (PN: WSS003) continuously transmitting and receiving form the antenna port.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas", is written over a light blue rectangular background.

Johnny Candelas
