Re: FCC ID: R7PEC1R1S1

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model Elster Multi-Function Meter Module (Elster MFMM) for single modular approval certification under FCC Part 15.247.

The Elster MFMM is a multi-function meter module that is installed in a specific host meter as the option board. The MFMM reads metering and event data from the host meter through the option board interface serial port and transmits the collected data using a short-range radio frequency spread spectrum modulation technique.

The Elster MFMM was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large, stylized 'R'.

Sam Wismer
