Re: FCC ID: R7PEC6R1S1

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology Inc., for evaluation of their model GPR for a modular approval certification under FCC Part 15.247.

The GRP is a battery powered commercial and industrial 2-way gas module operating in the frequency range of 902 MHz to 928 MHz. The GPR records electrical pulses that represent gas consumption, and then sends the data over the air to the utility head-end. The module is designed to provide 2-way communications within the Landis+Gyr Gridstream RF network, and can communicate with electric meters, routers, mesh extenders or radios on distribution automation devices.

The GPR was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large, stylized 'R' and a clear, legible name.

Sam Wismer
