Re: FCC ID: R7PEC6R1S2

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model Gridstream RF Enhanced A3 for a Class II Permissive Change Certification under FCC Part 15.247.

The Gridstream RF Enhanced A3 is an electronic endpoint module that will be integrated into the Elster A2 C&I meter. This device contains two separate radios on a single PCB: a 900 MHz ISM band frequency-hopping spread spectrum (FHSS) transceiver and a 2.4 MHz ISM band transceiver employing 802.15.4/Zigbee.

The purpose of this Class II Permissive Change is to add a new antenna type/host combination to the 900 MHz LAN frequency-hopping spread spectrum radio.

The Gridstream RF Enhanced A3 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive style with a large, stylized 'R'.
