Re: FCC ID: R7PEC6R1S4

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model GPR2-PT for modular approval certification under FCC Part 15.247 and 15.249.

The GPR2-PT is a commercial and industrial 2-way gas module operating in the frequency range 902.2 – 927.9 MHz and is intended for reading gas pressure and temperature from a corrector. The GPR2-PT is designed to provide two-way communications within an RF mesh network, and can communicate with electric meters, routers, mesh extenders or radios on distribution automation devices. The device operates utilizing a high power frequency hopping mode under FCC Part 15.247 and low power single channel mode under FCC Part 15.249.

The GPR2-PT was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large initial 'R'.
