Re: FCC ID: R7PER6R1S2

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model M120 for certification under FCC Part 15.247 and 15.249.

The M120 is a battery operated module operating in the 902 – 928 MHz frequency band. The M120 is designed for automated gas meter reading and has a 2-way radio that is compatible with electric meters, routers, and mesh extenders for relaying sensor data to the utility.

The M120 operates utilizing a high power frequency hopping mode under FCC Part 15.247 and low power single channel mode under FCC Part 15.249.

The M120 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive style with a large, stylized 'R'.
