Re: FCC ID: R7PNG0R1S3

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model S5 SBR for class II permissive change certification under FCC Part 15.247.

The S5 SBR contains (1) 900 MHz LAN frequency hopping spread spectrum radio that can operate in any one of five distinct modes of operation.

The purpose of this class II permissive change is to address a new host and antenna configuration.

The S5 SBR was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'.
