Re: FCC ID: R7PNG6R2S4

To Whom It May Concern:

The following application is submitted on behalf of our client, Cellnet Technology, Inc., for evaluation of their model Mesh Extender R240 for certification under FCC Part 15.247.

The Gridstream RF Series IV Mesh Extender is a radio transceiver operating in the 902-928 MHz unlicensed ISM band in conjunction with other Gridstream RF radios. It is designed to extend the range of the network in rural environments.

All modes of operation, including all available data rates, were evaluated. The Mesh Extender R240 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
