Re: FCC ID: R7PWGRS4

To Whom It May Concern:

The following application is submitted on behalf of our client, Cellnet Technology Inc., for evaluation of their model Series-4 Wangate for certification under FCC Part 15.247.

The Series-4 Wangate is used in the utility industry for automatic meter reading applications. The Series-4 Wangate is a two-way radio frequency device that uses Cellnet RF technology and protocol to transmit data over a mesh network in the unlicensed 902-928 MHz frequency range.

The Series-4 Wangate provides 4 modes of operation. All modes except the addition of the SUN mode have been evaluated under the original certification. This Class II Permissive Change covers the addition of the 50 kbps data rate (SUN mode). The Series-4 Wangate was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large initial 'R'.
