**Congratulations on your purchase of this wireless keyboard . This keyboard will finally free you of the constraints of your desktop by providing a cordless connection between your keyboard and your PC. This User's Guide contains all information that helps you to operate your wireless keyboard. In order to enjoy your wireless keyboard to their full potential we recommended you read this Guide carefully prior to installation.**

## **1. Introduction:**

This keyboard consists of Keyboard, and a compact receiver ( build with optional three feet pedestal ) . The keyboard can operate freely within a radius of at least 6.5 feet ( Typical )from the compact receiver, which itself use radio frequencies to transmit the cordless signal it has no constriction on viewing angles. The kit also offers more extra functionality greater efficiency and productivity when working with a PC.

When using computer, as with many activities, you may experience occasional discomfort to your hands, arms, shoulders, neck, or other parts of the body. When using Keyboard; eventually, you will not need taking your hand off the keyboard. Moreover, reduced typing activities and movements between keyboard can prevent "Repetitive Stress Injure". By using Keyboard you will not only experience and enjoy the most powerful and user-friendly input device, but also the personalized configuration and comfort.

Wireless Keyboard is compatible with Office 97/2000/2002XP、 Some future applications and Win95/98/ME/NT/2000/XP or later operation systems. NO driver is required except the models with scrolling function, as scroll wheel requires the driver in order to activate this function. The "Word", "Excel", "Power Point", "Calendar" and "Calculator" keys also require a shortcut. Basically you can just install "Keyboard" per plug and play without necessitating a driver, or install the driver to empower the keyboard with additional functions.

### **What's in this package :**

- **A cordless smart office keyboard**
- **A compact receiver ( build with three feet pedestal )**

## **2. System Requirement:**

- Microsoft Windows 95 / 98 / ME/ 2000/ XP or later ; NT4.0 with Service Pack 6 or later
- Microsoft Office 97 / 2000 / XP or later (Recommended not require)
- Microsoft Internet Explorer 5.0 or later (Win98 or later build-in already)

- **Remarks :**
  1. The keyboard uses 2pcs standard alkaline ( AA ) 1.5V batteries life is approximately 3-4 months, depending on the intensity of usage.
  2. Make sure the receiver is placed in a location relatively free of strong electromagnetic or transmission sources in order to ensure optimal reception of the keyboard and mouse signal. **It is strongly recommended, don't place the receiver near the monitor, as the magnetic field produced by monitor will interfere the receiver working and cause data reading error or missing; however, the PC system metal housing will interfere the receiver working also, to place the receiver in front of the monitor in order to prevent signal disturbance from the monitor.**
  3. **Warning : Standard alkaline may explode or leak if recharged or disposed of in fire.**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions.

- 1) This device may not cause harmful interference, and
- 2) This device must accept any interference received, including interference that may cause undesired operation.

**Per FCC 15.21, you are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.**
