

## Request for Supercede

**TO: Federal Communication Commission**

Please kindly be notified that we, Pan-World Control Technologies, Inc. herein request to supersede the MPE report under FCC ID: R8Y7RC04-CF100001 for the following reason:

There is one typo for 433.92MHz in the 6 page of the original MPE report. The correct statement in the MPE report should be "The EUT operates in the 2.4GHz" which we have corrected in the revised MPE report, instead the statement "The EUT operates in the 433.92GHz" in the original MPE report.

Pan-World Control Technologies, Inc. attests that the product that were certified under FCC ID: R8Y7RC04-CF100001 hasn't been marked in the U.S. Please kindly permit the supersede.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Eric Yen".
