

Test Report

Report No	EE0649-1
Client	Delta Systems, Inc.
Phone	330-422-5142
Fax	330-655-5039
FRN	0011099124
Models	2023-001 & 2024-001
FCC ID	R932023-001
Equipment Type	Remote Control Transmitter
Equipment Code	DSR
Results	As detailed within this report
Prepared by	 Mairaj Hussain – Test Engineer
Authorized by	 Michael Buchholz – EMC Manager
Issue Date	
Conditions of issue	This Test Report is issued subject to the conditions stated in 'terms and conditions' section of this

Curtis-Straus LLC is accredited by the American Association for Laboratory Accreditation for the specific scope of accreditation under Certificate Number 1627-01. This report may contain data which is not covered by the A2LA accreditation.

Summary

This report is an application for certification of a transmitter operating under 47 CFR 15.231(a) of the FCC rules provided for periodic operation within the band 40.66 - 40.7 MHz and above 70 MHz. The product covered by this report is Powerwinch. There are two parts of the product a transmitter and a receiver. Transmitter was tested according to FCC 15.231(a), whereas receiver was tested for spurious emissions in the frequency range of 30 – 5000 MHz. Both transmitter and receiver will be sold together as a system. All testing was done with fresh battery.

Please note that only the TX device is being submitted for certification. RX data is provided for informational purposes.

Product Description (Transmitter)

MN:	2023-001
SN:	Test sample 1
Cables:	None
Power Source:	12V Alkaline battery
Operating Mode:	Constant periodic Tx mode

Product Description (Receiver)

MN:	2024-001
SN:	Test sample 1
Cables:	DC power 1.5 m unshielded Antenna wire 0.3 m unshielded Motor wire 0.3 m unshielded External light (2) wire 0.1 m unshielded Switch (3) wire 0.3 m unshielded
Power Source:	RadioShack AC adapter cat no: 273-1779
Operating Mode:	Constant on Rx mode

Test Methodology

All testing was performed according to the procedures specified in ANSI C63.4 (2003).

<i>Frequency range investigated:</i>	30 MHz- 5000 MHz
---	------------------

<i>Measurement Distance:</i>		
<i>Frequency (MHz)</i>	<i>Distance (m)</i>	<i>Comments</i>
AC conducted (Rx only) 0.15 – 30MHz	-	Conducted
Fundamental 433.92MHz	3 m	Radiated
Spurious & harmonics 30 – 5000 MHz	3 m	Radiated

The EUT was maximized around three orthogonal axes. EUT antenna can not be maximized separately

All readings are peak unless otherwise noted.

Statement of Conformity

The PowerWinch has been found to conform with the following parts of the 47 CFR as detailed below:

47 CFR Part #	47 CFR Part #	Comments
	15.15(b)	The product contains no user accessible controls that increase transmission power above allowable levels.
2.925	15.19	The label is shown in the label exhibit.
	15.21	Information to the user is shown in the instruction manual exhibit.
	15.27	No special accessories are required for compliance.
	15.31(e)	Product is battery powered and therefore, voltage variation was not performed on Tx unit.
	15.203	The device utilizes an integrated loop antenna.
	15.204	The antenna is not accessible to the user and therefore cannot be easily removed.
	15.205 15.209	The fundamental is not in a Restricted band and the spurious emissions in the Restricted bands comply with the general emission limits of 15.209.
	15.207	Tx unit is battery powered, therefore conducted EMI was not performed. AC line conducted emissions were performed on Rx
15.231(a)	(1)	Product employs a switch which automatically deactivates the transmitter within 5 sec of being released.
	(2)	Product is manually operated.
	(3)	Product does not transmit periodically at regular predetermined intervals., it only transmit when a switch is pressed.
	(4)	Not used for radio control purposes during emergencies.
15.231(b)		Fundamental and spurious emissions meet the limits specified in this section.
15.231(c)		20dB bandwidth of the emission is less than 0.25% of the center frequency.
15.231(d)		Frequency tolerance is not required, because product does not operate in the specified band.
15.231(e)		Product complies with 15.231(a).

*Test Data and Plots***Section 15.231(a)**

Above plot shows that transmission shuts off in less than 5 seconds.

Section 15.231(b)

Fundamental							Curtis-Straus LLC					
Date: 23-Aug-04			Company: Delta Systems				Work Order: E0649					
Engineer: Mairaj Hussain			EUT Desc: Power Winch									
							Measurement Distance: 3 m					
Notes: RBW: 120KHz; VBW: 1MHz							EUT Max Freq: 433.92MHz					
Antenna Polarization (H / V)	Frequency (MHz)	Reading (dBμV)	Preamp Factor (dB)	Antenna Factor (dB/m)	Cable Factor (dB)	Adjusted Reading (dBμV/m)	---			FCC 15.231(b)		
							Limit (dBμV/m)	Margin (dB)	Result (Pass/Fail)	Limit (dBμV/m)	Margin (dB)	Result (Pass/Fail)
Hpk	433.92	60.8	0.0	17.0	3.1	80.9	---	---	---	100.8	-19.9	Pass
Havg	433.92	49.4	0.0	17.0	3.1	69.5	---	---	---	80.8	-11.3	Pass
Table Result: Pass by -11.3 dB							Worst Freq: 433.92 MHz					
Test Site: "T"		Pre-Amp: none		Cable: 65 ft RG8A/U		Analyzer: Yellow		Antenna: Green				
Above readings are adjusted by -11.4dB Duty Cycle CF.												

Sample Calculation:

Adjusted Reading = Reading – Pre Amp_(factor) + Antenna_(factor) + Cable_(factor)

Duty Cycle Correction Factor:

Total Lenght of message = ((4.24 * .5) + (35.8 * .636) + 2.12)ms

DCCF over 100ms = $20 * \text{Log}\left(\frac{27ms}{100ms}\right)$

= -11.4dB

Please also see duty cycle correction factor (DCCF) exhibit.

Fundamental

Section 15.231(C)

20dB bandwidth plot

0.25% of center frequency = $(433.92\text{MHz} * .0025) = 1.08\text{MHz}$

Conclusion: 20dB BW is less than 0.25% of center frequency.

Section 15.231(b), 15.205, & 15.209**Spurious Emissions**

Radiated Emissions Table											Curtis-Straus LLC

LIMITS

Quasi-Peak: 250μV = 47.9dBμV in the range 450kHz to 30MHz

[47 CFR 15.207(a) Revised as of October 1, 2001]

Note: On July 12, 2004, FCC adopts the conducted emissions limits of the European CISPR 22 standard as outlined below

Frequency of emission (MHz)	Quasi-peak limit (dBμV)	Average limit (dBμV)
0.15-0.5	66 to 56*	56 to 46*
0.5-5	56	46
5-30	60	50

*Decreases with the logarithm of the frequency.

[47 CFR 15.207(a) Revised as of October 1, 2002; amended by ET Docket 98-80; FCC 02-157, published in the Federal Register Vol. 67, No. 132, on Wednesday, July 10, 2002]

Line conducted testing was performed with 50Ω/50μH LISN.

Terms And Conditions

Paragraph 1. SERVICES. LABORATORY will:

- 1.1 Use the degree of care and skill ordinarily exercised by and consistent with the standards of the profession.
- 1.2 Perform all technical services in substantial accordance with the generally accepted laboratory principles and practices.
- 1.3 Retain all pertinent records relating to the services performed for a period of three (3) years following submission of the report describing such services, during which period the records will be made available to CLIENT upon reasonable request.

Paragraph 2. CLIENT'S RESPONSIBILITIES. CLIENT or his authorized representative will:

- 2.1 Provide LABORATORY with all plans, schematics, specifications, addenda, change orders, drawings and other information for the proper performance of technical services.
- 2.2 Designate a person to act as CLIENT's representative with respect to LABORATORY's services to be performed on behalf of the CLIENT; such person or firm to have complete authority to transmit instructions, receive information and data, interpret and define CLIENT's policies and decisions with respect to the LABORATORY's work on behalf of the CLIENT and to order, at CLIENT's expense, such technical services as may be required.
- 2.3 Designate a person who is authorized to receive copies of LABORATORY's reports.
- 2.4 Undertake the following:
 - (a) Secure and deliver to LABORATORY, without cost to LABORATORY, preliminary representative samples of the equipment proposed to require technical services, together with any relevant data.
 - (b) Furnish such labor and equipment needed by LABORATORY to handle samples at the LABORATORY and to facilitate the specified technical services.

Paragraph 3. GENERAL CONDITIONS:

- 3.1 LABORATORY, by the performance of services covered hereunder, does not in any way assume any of those duties or responsibilities customarily vested in the CLIENT, its employees, or any other party, agency or authority.
- 3.2 LABORATORY shall not be responsible for acts of omissions of any other party or parties involved in the design, manufacture or maintenance of the equipment or the failure of any employee, contractor or subcontractor to undertake any aspect of equipment's design, manufacture or maintenance.
- 3.3 LABORATORY is not authorized to revoke, alter, release, enlarge or release any requirement of the equipment's design, manufacture or maintenance unless specifically authorized by CLIENT or his authorized representative.
- 3.4 THE ONLY WARRANTY MADE BY LABORATORY IN CONNECTION WITH ITS SERVICE PERFORMED HEREUNDER IS THAT IT WILL USE THAT DEGREE OF CARE AND SKILL AS SET FORTH IN PARAGRAPH 1 ABOVE. NO OTHER WARRANTY, EXPRESS OR IMPLIED, IS MADE OR INTENDED FOR SERVICES PROVIDED HEREUNDER.
- 3.5 Where the LABORATORY indicates that additional testing is advisable to obtain more valid or useful data, and where such testing has not been authorized, CLIENT agrees to view such test reports as inconclusive and preliminary.
- 3.6 The LABORATORY will supply technical service and prepare a report based solely on the sample submitted to the LABORATORY by the CLIENT. The CLIENT understands that application of the data to other devices is highly speculative and should be applied with extreme caution.
- 3.7 The LABORATORY agrees to exercise ordinary care in receiving, preserving and shipping (F.O.B. Littleton, MA) any sample to be tested, but assumes no responsibility for damages, either direct or consequential, which arise from loss, damage or destruction of the samples due to the act of examination, modification or testing, or technical services or circumstances beyond LABORATORY's control.
- 3.8 The LABORATORY will hold samples for thirty (30) days after tests are completed, or until the CLIENT's outstanding debts to the LABORATORY are satisfied, whichever is later.
- 3.9 The CLIENT recognizes that generally accepted error variances apply and agrees to consider such error variances in its use of test data.
- 3.10 It is agreed between LABORATORY and CLIENT that no distribution of any tests, reports or analysis other than that described below shall be made to any third party without the prior written consent of both parties unless such distribution is mandated by operation of law. It is agreed that tests, reports, or analysis results may be disclosed to third party auditors of the laboratory at the laboratory facility in the course of accreditation maintenance audits. No reference to reports or technical services of the LABORATORY shall be made in any advertising or promotional literature without the express written permission of the LABORATORY.
- 3.11 The CLIENT acknowledges that all employees of LABORATORY operate under employment contracts with the LABORATORY and CLIENT agrees not to solicit employment of such employees or to solicit information related to other clients from said employees.
- 3.12 In recognition of the relative risks and benefits of the project to both CLIENT and LABORATORY, the risks have been allocated such that the CLIENT agrees, to the fullest extent permitted by law, to limit the liability of the LABORATORY to the CLIENT for any and all claims, losses, costs, damages of any nature whatsoever or claims expenses from any cause or causes, including attorneys' fees and costs and expert witness fees and costs, so that the total aggregate liability of the LABORATORY to the CLIENT shall not exceed \$100,000, or the LABORATORY'S total fee for services rendered on this project, whichever is greater. It is intended that this limitation apply to any and all liability or cause of action however alleged or arising, unless otherwise prohibited by law.

Paragraph 4. INSURANCE:

- 4.1 LABORATORY shall secure and maintain throughout the full period of the services provided to the CLIENT adequate insurance to protect it from claims under applicable Workmen's Compensation Acts and also shall maintain one million dollars of general liability coverage to cover claims for bodily injury, death or property damage as may arise from the performance of its services.
- 4.2 The CLIENT hereby warrants that it has sufficient insurance to protect its employees adequately under applicable Workmen's Compensation Acts and for bodily injury, death, or property damage.

- 4.3 No insurance of whatever kind or type, which may be carried by either party is to be considered as in any way limiting any other party's responsibility for damages resulting from their operations or for furnishing work and materials.

Paragraph 5. PAYMENT:

- 5.1 CLIENT shall pay to LABORATORY such fees for services as previously agreed, orally or in writing, within 30 days of presentment of a bill for such services performed. In the event CLIENT ordered, orally or in writing, services but such services were not assigned a rate for billing, such services shall be billed at the LABORATORY's reasonable and customary rate.
- 5.2 CLIENT shall be responsible for all shipping, customs and other expenses related to services provided by LABORATORY to the CLIENT, and shall fully insure any test sample or other equipment provided to LABORATORY by the CLIENT.
- 5.3 Amounts overdue from CLIENT to LABORATORY shall be charged interest at a rate of 1½% per month.

Paragraph 6. ISO/IEC GUIDE 17025 ADDITIONS:

- 6.1 CLIENT agrees that this test report will not be reproduced except in full, without written approval from the LABORATORY.
- 6.2 CLIENT agrees that this test report shall not be used to claim product endorsement by A2LA or ANSI or any agency of the U.S. Government.
- 6.3 CLIENT agrees that test results presented herein relate only to the sample tested by the LABORATORY.

No. 1627-01) 10/31/03 of 11</p> <p>Electromagnetic Compatibility (EMC)- Part 6: Generic standards- Section 1: Immunity for residential, commercial and light-environments Electromagnetic Compatibility (EMC)- Part 6: Generic standards- Specification for Uninterruptible Power Systems (UPS). Part 2: requirements Information technology equipment – Immunity Characteristics – and methods of measurement. Electromagnetic Compatibility – Product family standard for video, audio-visual and entertainment lighting control apparatus professional use. Part 1: Emission Electromagnetic Compatibility – Product family standard for video, audio-visual and entertainment lighting control professional Part 2: Immunity Electrical equipment for measurement, control and laboratory use EMC requirements Equipment for general lighting purposes – EMC immunity Alarm Systems. Part 4: Electromagnetic compatibility. Product standard: Immunity requirements for components of fire, intruder social alarm systems. Electromagnetic compatibility immunity – requirements for appliances, tools and similar apparatus. Product family standard. Cabled distribution systems for television and sound signals. Part Electromagnetic compatibility for equipment. Medical electrical equipment Part 1: general requirements for Section 2: Collateral standard: Electromagnetic compatibility – Adjustable speed electrical power drive systems. Part 3: EMC standard including specific test methods. Disturbances in supply systems caused by household appliances similar electrical equipment. Part 2: Harmonics Disturbances in supply systems caused by household appliances similar electrical equipment. Part 3: Voltage fluctuations. Electromagnetic compatibility (EMC). Part 3: Limits Section 2: for harmonic current emissions Electromagnetic compatibility (EMC). Part 3: Limits Section 2: Limitation of voltage fluctuations and flicker in low-voltage systems. Equipment Engineering (EE); Public telecommunication network equipment electro-magnetic compatibility (EMC) requirements Product family overview, compliance criteria and test levels</p>
