Administration**

JUL 31 2007

Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have received the Nemko AS, letter for the Federal Communications Commission (FCC) certification application of the Jotron AS, 7000 series ground to air communications equipment, Receiver Model RA-7203 and Transmitter Model TA-76XX with FCC ID RA9RA-7302 and RA9TA-76XX respectively, dated June 15, 2007, and have completed the subject review. We have no objection to the FCC certification of this very high frequency (VHF) Jotron AS ground to air radios, which operate in the aviation protected VHF 118 MHz to 136.975 MHz band, providing 8.33 MHz will not be exercised within the United States National airspace.

If you require any additional information, please contact Ms. Annette Allender, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Frazier".

Robert A. Frazier
Manager, Spectrum Planning and
International Office
