Re: FCC ID: RAB-IM711-200

To Whom It May Concern:

The following application is submitted on behalf of our client, Comverge Inc., for evaluation of their model DirectLink WiFi for modular approval certification under FCC Part 15.247.

The DirectLink WiFi module operates in the frequency range 2412 – 2462 MHz and is used in conjunction with a HVAC thermostat, which will allow the energy company to monitor the operating time of the HVAC system and adjust the operation time to aid in an energy demand reduction to the power grid.

The DirectLink WiFi was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
