Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

Ref: FCC ID: RAD116

Dear Sirs:

TCT Mobile Limited requests acceptance of the labeling proposal described below for cell phone bearing FCC identifier RAD116.

The subject USB modem are compact portable models as shown in figure 1, authorized under 47CFR Part 22H&24E for mobile services.

Figure 1.

Because the majority of the device housing is composed of USB port, LED, Logo and a removable back shell of simcard-slot, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because the battery pack is a removable item. For this reason, TCT Mobile Limited proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

Figure 2.

The consumer packaging for these models includes the back shell as a separate item, NOT installed on the radio. As such, the FCC identifier will be readily visible to the user before the back shell is installed and whenever the back shell is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), TCT Mobile Limited will add the FCC identifier "RAD116" to the outside of the consumer "gift box" packaging.

Thank you for your attention to this matter.

Yours Sincerely,

Signatory

A handwritten signature in black ink, appearing to read "Kong Ying".
