· RADIO WAVES:

THIS CELLPHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSLIRE TO RADIO WAVES

Your cellphone is a radio transmitter and receiver. It is designed and manufactured

Changes or modifications not expressly approved by the party responsible for not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

exposure standard for cellphones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the cellphone transmitting at its

Although the SAR is determined at the highest certified power level, the actual SAR Your cellphone is equipped with a built-in antenna. For optimal operation, you should level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the cellphone Before a cellphone model is available for sale to the public, compliance with national egulations and standards must be shown.

The highest SAR value when tested is xxx W/kg (OT-305A), 1.13 W/kg (OT-508A) for ZICOrporation its Affiliates use at the ear and xxxW/kg (OT-305A),1.24W/kg (OT-508A) for use close to the body. While there may be differences between the SAR levels of various cellphones and a various positions they all meet the government requirement for RF exposure For pody-worn operation, the cellphone meets FCC RF exposure guidelines provided that iurisdiction or your region has suitable recycling and collection facilities; instead they it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure compliance with ECC RF exposure guidelines The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of cellphones. If individuals are concerned, they might choose to limit their own or their INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep cellphones away from the head and body (fact sheet n°193). Additional WHO information about electromagnetic fields and public health are available on the following website: http://www.who.int/peh-emf.

On our Internet site, you will find our FAQ (Frequently Asked Questions) section. You can also contact us by e-mail to ask any questions you may have.

Your cellphone is a transceiver that operates on GSM networks with 850 and 1900 MHz bands.

Protection against theft (1)

Your cellphone is identified by an IMEI (cellphone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your cellphone by entering *#06# and keep it in a safe place. It may be requested by the police or your operator if your cellphone is stolen. This number allows your cellphone to be blocked preventing a third person from using it, even with a different SIM card.

Disclaimer
