To personalize your wallpaper, you can select one of the following two ways:

· Touch and hold an empty area from the Home screen, select "Wallpaper", then tap a folder to select an image as your wallpaper

• Tap from the tool bar, select "Wallpaper", then tap a folder to select an image as your wallpaper

Home screen is provided in an extended format to allow more space for adding applications, shortcuts etc. Slide the Home screen horizontally left and right to get a complete view of the Home screen. Small dots at the bottom of the screen indicate which screen you are viewing.

I.4 Toolbar

Tool bar with menu items by default as a shortcut for quick access.

Set-up

Removing or installing the back cover

Inserting or removing the SIM card

You must insert your SIM card to make phone calls. Please powe off your cellphone and remove battery before inserting or removing the SIM card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press and slide it out.

Installing or removing the battery

Insert and click the battery into place, then close the cellphone

Unclip the cover, then remove the battery

Charging the battery

Connect the battery charger to your phone and outlet respectively

To reduce power consumption and energy waste, when battery is fully charged, disconnect your charger from the plug; switch off Wi-Fi, Bluetooth or background-run applications when not in use; reduce the backlight time

Your cellphone is fitted with a camera for taking photos and shooting videos that you can use in different ways: store them in your "File manager\My creations"

- send them in a multimedia message (MMS) to a cellphone or an email address.
- send them directly by Email or Bluetooth.
- customize your main screen.
- select them as incoming call image to a contact in your directory. transfer them by data cable or microSD card to your computer

With this menu, you may personalize ringtones for different events and environments.

File manager....

You will have access to all audio and visual files stored in cellphone or SD card in File manager. You can access a number of items with this option: My audios, My images, My videos, Ebook, My creations, Others, Phone, SD card and Memory status.

Inserting SD card:

To release the microSD card holder, slide it in the direction of the arrow and lift it. Then insert the microSD card with the golden contact downward. Finally, turn down the microSD holder and slide it in the opposite direction to lock it.

Access this feature by tapping to enter the main menu, th selecting "Bluetoot

To access this function, tap to enter the main menu, and select

() Depending on your model.

181 Calendar

Once you enter this menu from the main menu, there is a monthly view calendar for you to keep track of important meetings appointments, etc. Days with events entered will be marked in color

18.2 Calculator.

Access this feature by selecting "Calculator" from the main menu. Enter a number, select the type of operation to be performed, and enter the second number, then press "OK" to display the result.

18.3 Notes.....

You can create a note in text or voice format by accessing "Notes" from the main menu

18.4 Tasks ...

Enables you to easily manage and track the progress of a task with priorities. All the tasks will be sorted by due date

18.5 Clock

18.5.1 Alarm

Your cellphone has a built-in alarm clock with a snooze feature.

18.5.2 World clock

The World clock shows current local time and the time zone in different cities.

18.5.3 Date and time

Allows you to have settings of date and time, including 12/24h format

that may cause undesired operation. Your cellphone is equipped with a built-in antenna. For optimal operation,

you should avoid touching it or degrading it. As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset or ush data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the cellphone at least 1.5 cm awa from the body.

Unable to receive incoming calls

Make sure your cellphone is switched on and connected to a network (check for overloaded or unavailable network) Check your subscription status with your operator (credit, SIM card valid, etc.)

Make sure you have not forwarded incoming calls Make sure that you have not barred certain calls

The caller's name does not appear when a call is received

· Check that you have subscribed to this service with your operator Your caller has concealed his/her number

The sound quality of the calls is not optimal

You can adjust the volume during a call by means of the Volume key Check the network strength

environment, so that their components can be reused

In European Union countries

hese collection points are accessible free of charge. All products with this sign ust be brought to these collection points.

In non European Union jurisdictions

Items of equipment with this symbol are not be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled. In the United States you may learn more about CTIA's Recycling Program at

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

• CHARGERS

Home A C / Travel chargers will operate within the temperature range of 0°C (32°F) to 40°C (104°F).

The chargers designed for your cellphone meet with the standard for safety of information technology equipment and office equipment use. Due to different applicable electrical specifications, a charger you purchased in one iurisdiction may not work in another jurisdiction. They should be used for this purpose only.

Characteristics of power supply (depending on the country) Travel charger: Input: 100-240 V, 50/60 Hz, 0.15 A

Output: 5 V. 400/550 mA Lithium 1000 mAh

· RADIO WAVES

THIS CELLPHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES

Your cellphone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independen cientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure ne safety of all persons, regardless of age and health

The exposure standard for cellphones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Governme (FCC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the cellphone transmitting at its highest certified power level in all tested frequency bands

Although the SAR is determined at the highest certified power level, the actual SAR level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general,

I am unable to use the features described in the manual Check with your operator to make sure that your subscription

- includes this service
- Make sure this feature does not require an Alcatel accessory

When I select a number from my Contacts, the number is not dialled

Make sure that you have correctly recorded the number in your file Make sure that you have selected the country prefix when calling a foreign country

I am unable to add a contact in my Contacts

Make sure that your SIM card directory is not full; delete some contacts or save the contacts in the cellphone directory (i.e. your professional or personal directories)

My callers are unable to leave messages on my voicemail Contact your network operator to check service availability

- I cannot access my voicemail
- · Make sure your operator's voicemail number is correctly entered
- in "My numbers"
- Try later if the network is busy

I am unable to send and receive MMS

- Check your cellphone memory available as it might be full Contact your network operator to check service availability and
- check MMS parameters
- Verify the server center number or your MMS profile with your operator
- The server center may be swamped; try again later

The red 🔀 icon is displayed on my standby screen

You have saved too many short messages on your SIM card; delete some of them or archive them in the cellphone memory

"No service" is displayed

- You are outside of the network coverage area
- I have already entered 3 incorrect PIN codes Contact your network operator to obtain the PUK code (Personal Unblocking Key)

the closer you are to a wireless base station antenna, the lower the powe output of the cellphone. Before a cellphone model is available for sale to the lic, compliance with national regulations and standards must be she The highest SAR value for this model cellphone when tested is 0.859 W/K g for use at the ear and 0.92 W/Kg, for use close to the body.

While there may be differences between the SAR levels of various cellphon and at various positions, they all meet the government requirement for RF exposure. For body-worn operation, the cellphone meets FCC RF exposure uidelines provided that it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site: http://www

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of cellphones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using ands-free" devices to keep cellphones away from the head and body (fact sheet n°193). Additional WHO information about electromagnet fields and public health are available on the following website: http://www

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the ECC Rules These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receive
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/ TV technician for help Changes or modifications not expressly approved by the party responsible compliance could void the user's authority to operate the equip For the receiver devices associated with the operation of a licensed radio service (e.g. FM broadcast), they bear the following statement: This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

other devices, they bear the following state This device complies with Part 15 of the ECC Rules. Operation is subject to the following two conditions:

I) this device may not cause harmful interference

(2) this device must accept any interference received, including interference
