# 2.I Set-up

Removing and installing the back cover

# Removing and installing the battery

# Inserting and removing the SIM card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press it and slide it out.

# Charging the battery

Connect the battery charger to your cellphone and outlet respectively. • The charging may take about 20 minutes to start if the

- battery is flat.
- Be careful not to force the plug into the socket.
- Make sure the battery is correctly inserted before connecting the charger.
- The outlet must be near to the cellphone and easily accessible (avoid electric extension cables).
- When using your cellphone for the first time, charge the battery fully (approximately 3 hours). You are advised to fully charge the battery ( 🗐 ).
- To reduce power consumption and energy waste, when battery is fully charged, disconnect your charger from the plug; switch off Bluetooth when not in use; reduce the backlight time, etc.

# 2.2 Power on your cellphone

Hold down the O J key until the cellphone powers on.

# 2.3 Power off your cellphone

Hold down the . J key from the main screen.

# One Touch Upgrade

Using One Touch Upgrade tool you can update your cellphone's software from your PC.

Download One Touch Upgrade from ALCATEL website (www. alcatelonetouch.com) and install it on your PC. Launch the tool and update your cellphone by following the step by step instructions (refer to the User Guide provided together with the tool).

Your cellphone's software will now have the latest software. Shift key 🔶

All personal information will be permanently lost following the update process. We recommend you backup your personal data using PC Suite before upgrading.

# Webcam (I

- You can use your cellphone as a webcam for instant messaging on your PC.
- Connect your cellphone to PC via USB cable. Del key 🥢 : • Go to "My computer" folder on your PC and find USB video device (Under Scanners & Cameras).

The using of webcam may vary according to the operating system of your

# Alcatel Mobile Phones Limited Warranty.....

TCT Mobile North America LTD warrants to the original retail purchaser of this wireless device, that should this product or part thereof during normal consumer usage and condition, be proven to be defective in material or workmanship that results product failure within the first twelve (12) months from the date of purchase as shown on your original sales receipt. Such defect(s) will be repaired or replaced (with new or rebuilt parts) at the company's option without charge for parts or labor directly related to the defect(s).

Batteries, power adapters, and other accessories sold as in box items are also warranted against defects and workmanship that results in product failure within the first six (6) months period from the date of purchase as shown on your original sales receipt. Such defect(s) will be repaired or replaced (with new or rebuilt parts) and the company's option without charge for parts or labor directly related to the defect(s).

The limited warranty for your wireless device will be voided if any of the following conditions occur:

 Non-compliance with the instructions for use or installation, or with technical and safety standards applicable in the geographical

- area where your cellphone is used: • Connection to any equipment not supplied or not recommended
- by TCT Mobile; Modification or repair performed by individuals not authorized by TCT Mobile or its affiliates:
- Acts of god such as Inclement weather, lightning, power surges, fire, humidity, infiltration of liquids or foods, chemical products, download of files, crash, high voltage, corrosion, oxidation; • Removal or altering of the wireless devices event labels or serial numbers (IMEI):

Damage from exposure to water or other liquids, moisture, humidity, excessive temperatures or extreme environmental conditions, sand, excess dust and any condition outside the operating guidelines;

# Latin input mode...

# Safety and use.....

We recommend that you read this chapter carefully before using your cellphone. The manufacturer disclaims any liability for damage, which may esult as a consequence of improper use or use contrary to the instructions contained herei

# TRAFFIC SAFETY:

iven that studies show that using a cellphone while driving a vehicle onstitutes a real risk, even when the hands-free kit is used (car kit, headset...) drivers are requested to refrain from using their cellphone when the vehicle is not parked. Check the laws and regulations on the use of wireless cellphones. and their accessories in the areas where you drive. Always obey them The use

of these devices may be prohibited or restricted in certain areas. When driving do not use your cellphone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some

When switched on your cellphone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem

- do not place your cellphone on top of the dashboard or within an airbag deployment area.
- check with your car dealer or the car manufacturer to make sure that the car's electronic devices are shielded from cellphone RF energy.
- CONDITIONS OF USE You are advised to switch off the cellphone from time to time to optimize
- its performance. Remember to abide by local authority rules of cellphone use on aircrafts
- Operational Warnings: Obey all posted signs when using mobile devices in public

Follow Instructions to Avoid Interference Problems: Turn off your mobile device in any location where posted notices instruct you to do so. In an aircraft turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight

Switch the cellphone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, cellphones can interfere with other electrical or electronic devices, or equipment using radio

Switch the cellphone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, gas station, or chemical plant, or in any potentially explosive atmosphere.

# Troubleshooting.....

- Before contacting the service center, you are advised to follow the instructions below
- You are advised to fully charge (  $\blacksquare$  ) the battery for optimal operation
- Avoid storing large amounts of data in your cellphone as this may affect its performance
- Use User Data Format and the One Touch Upgrade tool to perform cellphone formatting or software upgrading, (to perform User Data format, hold down # while simultaneously pressing the power on/off key). ALL User cellphone data: contacts, photos, messages and files, downloaded applications like Java games will be lost permanently. It is strongly advised to fully backup the cellphone data and profile via PC suite before doing formatting and upgrading.

and carry out the following checks:

## My cellphone cannot switch on

- Check the battery contacts, remove and reinstall your battery, then turn your cellphone on Check the battery power level, charge for at least 20 minutes
- If it still does not work, please use User Data Format to reset the cellphone or One Touch Upgrade to upgrade software
- My cellphone is frozen or has not responded for several
- Restart your cellphone by pressing and holding the O J key
- Remove the battery and re-insert it, then restart the cellphone
- If it still does not work, please use User Data Format to reset the cellphone or One Touch Upgrade to upgrade software

### My cellphone turns off by itself

- Check that your keypad is locked when you are not using your cellphone, and make sure power off key is not miscontacted due to unlocking keypad
- Check the battery charge level
- If it still does not work, please use User Data Format to reset
- the cellphone or One Touch Upgrade to upgrade software

My cellphone cannot connect to the Internet Check that the IMEI number (press \*#06#) is the same as the

- Check your phone memory availability as it might be full
- Contact your network operator to check service availability and check MMS parameters
- Verify the server center number or your MMS profile with
- your operator
- The server center may be swamped, try again later
- The flickering icon is displayed on my standby screen
- You have saved too many short messages on your SIM card: delete some of them or archive them in the phone memory

## the safety of all persons, regardless of age and health

e exposure standard for cellphones employs a unit of measurement know as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body ue. Tests for SAR are conducted using standard operating positions wit the cellphone transmitting at its highest certified power level in all tested frequency bands

ompliance could void the user's authority to operate the equipmen or the receiver devices associated with the operation of a licensed radio

the condition that this device does not cause harmful interference.

that may cause undesired operation.

Although the SAR is determined at the highest certified power level, the actual SAR level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the pow output of the cellphone. Before a cellphone model is available for sale to the public, compliance with national regulations and standards must be shown. e highest SAR value for this model cellphone when tested is 1.14 W/Kg for

use at the ear and 1.13 W/Kg for use close to the body. While there may be differences between the SAR levels of various cellphones and at various positions, they all meet the government requirement for RF osure. For body-worn operation, the cellphone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure liance with FCC RF exposure guidelines.

Additional information on SAR can be found on the Cellular Telecommunication & Internet Association (CTIA) Web site: http://www.phonefacts.net

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of cellphones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free devices to keep cellphones away from the head and body, (fact sheet n°193 Additional WHO information about electromagnetic fields and public health are available on the following website: http://www.who.int/peh-emf
