Request for supersede of SAR report

To whom it concerns:

We were informed by TMC lab that FCC started an inquiry about whether TMC followed the instructions the FCC provided to TMC in KDB 194992, which confirmed that TMC may calibrate its SAR probes.

TMC said they responded to this inquiry immediately and decided before the inquiry was finished TMC should stop the current SAR measurement.

So we decided to retest SAR and HAC on our product one touch 918S (FCC ID: RAD260) in another lab TA-Shanghai, and supersede the current SAR, HAC reports and user manual on FCC website for FCC ID: RAD260 to avoid any further concern on this application.

Best Regard

Gongzhizhou
