◆ **The Alcatel app store icon on the main screen**

Click "Application Store" and the APK download screen appears. You can download and install the APK applications you like.

VII. Trouble Shooting

Q: Why is my composite video connector of HD connector not shown?

A: 1.Check whether the connectors of different colors are installed as indicated in the instruction;
   2.Check whether the input mode has been set up for signal reception from the mainframe. Make sure to the video input mode is set up properly.
   3.Check whether the video connector is installed correctly.

Q: Why can't I access the Internet after upgrade?
   Click "Setup", and re-configure network access setup.

A:

Q: How to install the software applications?

A: 1.Copy the applications in a USB or SD card;
   2.Click "Applications" on the main screen and select "Install Applications";
   3.Select /mnt/sda (USB) or /mnt/sdcard (SD card);
   4.Select the application you want to install and click "Install".

Q: Why can't the application stored be displayed in full screen?

A: Some programs have a fixed resolution, which might be inconsistent with that of the device. In this case, the application won't be displayed in full screen.

Q: How to make it easier to visit my favorite websites?

A: Click the browser to enter the webpage. Press the menu button on the remote controller. Move the cursor to "Add Bookmark Here". Enter name and address, and click "OK".

VIII. Caution

In case of any of the following exceptions or failures, turn off the device and unplug the power socket immediately. Contact our designated service staff for the repair of the device. DO NOT repair it yourself to avoid accidents.

- The device smokes, or gives off odd smell or sound.
- Liquid or metal objects get into the device.
- There's no image or sound after the power supply is plugged and unplugged several times.
- The housing of the device is damaged in a drop or collision.

Protect the power cable and plug carefully to prevent fire or electric shocking accident.

- Do not cover the power cable with heavy objects.
- Do not fix the power cable with metal nails.
- Be careful not to damage, refit, bend, twist, extend, or bake the power cable when plugging or unplugging it.
- Please contact our service staff if the core of the power cable is exposed or broken.
- If the power cable cannot be plugged in, or is too loose when plugged in, replace your power socket to avoid electric shocking or fire accident due to exposure of the metal part.

Instructions for the storage of the device:

- Do not put the device on tumbling or tilt surfaces to avoid drop or rolling down, which might result in injury or failure of the device.
- Keep the device away from liquid or small metal objects, which might cause fire or electric shocking accident when they get inside.
- Do not put any candle or oil lamp on the device to prevent fire accidents.
- Do not use the device near windows, or in the bathroom to avoid fire or electric shocking accident due to moisture.

Instructions for the use of the device:

- The device uses high-voltage current inside its housing. To avoid fire and electric shocking accident, do not open the housing, or attempt to repair or refit the device. None of the parts shall be repaired by the user himself. Please contact our service staff for any repair work.
- Please take action to prevent any object (metal or flammable) from getting into the device from the ventilation hole to avoid fire or electric shocking accidents.
- If it is necessary to use the same power supply socket for a number of devices, please make sure that the total power does not exceed the rated power of the power socket or the power cable to avoid fire accident.
- DO NOT touch the power cable or power plug in times of lightning to avoid electric shock accidents. Use power supplies that fit the device or those recommended in the instructions to avoid fire or electric shock accidents.
- Be alerted when using the device in conditions of unstable voltages, and be prepared to cut off power supply whenever necessar .

  Clean the power plug and socket routinely, as dust and foreign substances would cause fire when they get wet.

- Working environment.
  Temperature:0-40℃   Humidity:95%

CE safety guidance

Due to the used enclosure material, the TCT Smart TV BOX   shall only be connected to a USB Interface of version 2.0 or higher. The connection to so called power USB is prohibited.

The adapter shall be installed near the equipment and shall be easily accessible.

When charging, please place the phone in an environment that has a normal room temperature and good ventilation. It is recommended to charge the phone in an environment with a temperature that ranges from 0℃~35℃. Please ensure to use only the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

The maximum operating ambient temperature of the equipment declared by the manufacturer is 40℃

EU Regulatory Conformance
Hereby, TCT Mobile Limited declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC(referred to as R&TTE Directive): Article 3.1a, 3.1b and3.2

CE 0700①

Notice: Observe the national local regulations in the location where the device is to be used. This device may be restricted for use in some or all member states of the European Union (EU)

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.   These limits are designed to provide reasonable protection against harmful interference in a residential installation.   This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.   However, there is no guarantee that interference will not occur in a particular installation.   If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 -Consult the dealer or an experienced radio/TV technician for help

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
