Tim,

We will revise user manual for you again. My client tell me about how to distinguish the class :

Class 1 = 4dBm ~ 20dBm
Class 2 = 0dBm ~ 4dBm
Class 3 = below 0dBm

Due to the output power is about 10 dBm, so it belongs to class 1 bluetooth device, the original documentation is correct.

If it is right then we will revise user manual to class 1 for you.

Any comment please inform us.

Thanks

Best Regards.

å³ä½³é'« / Ellis Wu
