Dear Tim:

Would you mind to help us to check why the FRN no. is not valid.
On the website, it is existed, and our client have no idea what is the
matter.

And we revised the block.
And about the comment 4, the card is an coverter, it is used to connect PC
and the EUT.

And about the comment 5, we used the more worst situation to calculate it.
And the error on the plot shows no more than 4dB, but the restrict band is
under more than 4dB.
So do you think we really need to change the plot.

Here is the declaration letter.

(See attached file: Declaration form.pdf)

Thank you for your kind assistance.
