RE: X-Micro Technology Corp.

FCC ID: RAFXWL-11GRAG

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The manual mentions rates up to 108 Mbps, however the test report does not make mention of this, nor is there any data to support this mode.. Typically this mode requires additional measurements of bandwidth, power, spectral density, bandedge, etc. However this information does not appear to have been provided. Please provide.
- 2) A new sample label was provided today. However, this label has RAFXWL-11GPAG instead. This label does not appear to match all the other documentation in this application. Please confirm which FCC ID is correct and correct all necessary exhibits that may be affected.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
