

Response to TCB Findings

1. Test data is needed when the device operates with 2 antennas connected and compliance should be demonstrated. The user's should also be instructed in the manual about the installation of the 2 antenna configuration the way it will be tested for compliance.

Response: Additional test data for the 2 antenna configuration has been supplied. User's manual has now instructions on 2 antenna installation to ensure compliance.

2. The label should include the compliance statement required by 15.19(a)(3). Please provide new label sample.

Response: Supplied. Please see the new label sample.
