Class II Permissive Change Letter

This is to confirm that this equipment is identical to the previously certified FCC ID: RAR20005003 except for the addition of a new frequency band for operation as DTS (Digital Transmission System) under 15.247. The changes are accomplished by software and cannot be made by the end user. The changes can only be made by the Grantee or some other party under the control of the Grantee. An EMC test report and RF exposure exhibit has been submitted in order to demonstrate that the equipment complies with the FCC requirements in the new band.
