Request for dismissal  
Ref: Confirmation Number TC664518

Dear Sir/Madam,

Please dismiss our filing: FCC ID: RAR20005003 class II permissive change, grant date 11/28/2006.

It was our understanding (See Response to KDB Inquiry to FCC Tracking Number 902303) that a filing to add the DTS band to an NII device could be done as a class II permissive change. On 11/28/2006 we attempted to file this as a class II permissive change in order to change this device from a non-composite NII device to a composite device consisting of NII and DTS. The system would not allow us to complete the filing. Upon further discussions with FCC we have been advised that an original equipment filing is required.

Regards
